

RICHA CHANDRA

Product Manager

+91-9820904340 • richachandra07@gmail.com • linkedin.com/in/richachandra7 • Mumbai

Summary

Product Manager with 14+ years in financial services, driving 0→1 product builds and platform modernization across capital markets, credit cards, and regulatory tech. Led cross-functional squads of up to 15 engineers and designers to ship products that improved operational efficiency by 40%, boosted feature adoption by 3x, and maintained 99.5%+ platform uptime. Deep expertise in AI product enablement (Copilot, LLM-based triage agents), post-trade workflows, and regulatory compliance platforms. Certified PSPO & PSM with a strong bias toward data-driven roadmap decisions, rapid prototyping, and measurable business outcomes

Experience

Morgan Stanley

Mumbai

Product Lead

06/2021 - 05/2026

Managed the development of innovative software products in a fast-paced tech environment

- Defined product strategy, roadmap and led end-to-end delivery of Withholding Tax Reporting modernization platform serving 50K+ accounts, achieving 100% regulatory compliance and reducing audit escalations by 60%
- Spearheaded comprehensive competitive market research and "buy-vs-buy" capability analysis against 3 major external SaaS vendors, establishing a localized product roadmap that saved \$1.2M in licensing fees while maintaining 100% proprietary data control
- Launched an AI-powered Production Support Agent (Microsoft Copilot) that automated L1 triage using historical incident data, reducing mean-time-to-resolution (MTTR) by 35% and saving 120+ engineering hours/month
- Designed advanced data control and enrichment workflows for post-trade exception handling, reducing downstream reconciliation failures by 25% while elevating client trust and securing a 99% multi-million dollar platform retention rate
- Led rapid prototyping sprints for Voucher Generation portal (50+ wireframes in Balsamiq), cutting time-to-market by 30% and increasing internal user adoption by 2x within the first quarter
- Acted as the primary product interface for ED and MD-level stakeholders, delivering outcome-based reporting tied to OKRs across cost, risk, reliability, and adoption metrics

JPMorgan Chase

Mumbai

Product Owner

12/2016 - 06/2021

Shipped credit card onboarding platform – 25% faster time-to-market

- Owned and launched the credit card onboarding product roadmap end-to-end, automating workflows that eliminated 400+ hours/quarter of manual processing and reduced time-to-market for new card launches by 25%
- Managed the product backlog as Area Product Owner for 3 squads, improving story readiness and acceptance rate and increasing sprint completion rate to 92%
- Partnered with global payments teams to redesign the balance transfer flow, improving payment processing accuracy by 15% and saving 900+ FTE hours annually through automation
- Built and shipped KPI dashboards tracking platform adoption, cost-per-transaction, reliability, and risk posture – enabling senior leadership to tie engineering spend to measurable business value
- Drove quarterly roadmap planning with structured value-vs-effort prioritization, maintaining 80%+ alignment with business-critical initiatives across 4 product lines
- Introduced Agile best practices (BDD with Cucumber/Gherkin, outcome-oriented sprint planning) that improved defect detection by 40% and reduced QA cycle time by 30%

JPMorgan Chase

Mumbai

Application Developer

09/2013 - 06/2014

Automated reporting workflows – 40% reduction in processing time

- Automated 5 business-critical reporting workflows, reducing manual processing time by 40% and freeing up 60+ analyst hours/month for higher-value tasks
- Led UI/UX redesign of legacy application using Figma prototypes (15+ wireframes), achieving 90% positive usability feedback and improving task completion rate by 20%
- Shipped 15 feature enhancements across 10 modules, improving application performance by 25% and reducing support tickets by 30%

Experience

IGATE

Mumbai

Software Analyst

12/2010 - 02/2013

Delivered 3 major product releases on time – 25% sprint transparency improvement

- Managed a cross-functional team of 9 developers and QA engineers, delivering 3 major product releases on time and within budget with zero critical post-launch defects
- Facilitated agile ceremonies and 10+ cross-functional alignment sessions, improving sprint transparency by 25% and reducing requirement ambiguity by 35%
- Built and maintained a defect tracking system for 200+ issues, improving developer response time by 40% and reducing average resolution time from 5 days to 3 days

JPMorgan Chase

Mumbai

System Analyst

08/2008 - 11/2010

Automated 75% of system processes – 25% faster operational reporting

- Led process automation via CyberArk onboarding, automating 75% of manual system workflows and reducing operational overhead by 30%
- Designed and deployed SQL-based operational dashboards that improved reporting speed by 25% and enabled real-time visibility into system health for 8 client accounts
- Resolved 50+ production incidents as IT-business liaison, maintaining 99%+ system uptime and reducing average incident resolution time by 20%

Projects

Side Projects

- **My Kitchen – A Multi-Agent Home-Chef Marketplace** - A multi-agent system that reliably matches home chefs with customers by breaking the order lifecycle into purpose-built agents – each designed to fail gracefully. Tech Stack: **Framework:** React 19 + TypeScript file-based routing **Styling:** Tailwind CSS 4 (via @tailwindcss/vite plugin) **Backend/DB:** Firebase Firestore (database) Firebase Authentication (Google Sign-In + Anonymous) **Built and shipped on:** Claude Code and Firebase Hosting
- **ProteinGPT – Your Protein Recommendation Engine** - An AI guide that cuts through a confusing, adulteration-prone supplement market to deliver personalized, trustable protein recommendations. Tech Stack: **Framework:** TanStack Start (React 19 + TanStack Router, file-based routing) **Styling:** Tailwind CSS v4 + shadcn/ui (Radix primitives) **Backend/DB:** Supabase (Postgres + Auth) **Built and shipped on:** Lovable
- **Multi LLM Comparison (WIP)** - A single-user web app for chatting with multiple LLMs at once and comparing their answers side by side – with per-response cost, token, and latency data Tech Stack : **Framework:** Next.js, **Backend/DB:** Supabase, OpenRouter, **Built and shipped on:** Lovable and Vercel

Case Studies

- **Licious – Predictable Meat Logistics**- Turning fixed weekly routines into a logistics optimization engine through flexible subscriptions and provable delivery trust.
- **Zoho – The Mid-Market Business OS**- Repositioning a feature-rich underdog into the category owner of the mid-market – the white space Google and Microsoft leave wide open.

Skills

Product Management:

Product Vision & Strategy · Roadmap Ownership · MVP & Increment Planning · OKRs & North Star Metrics · Product Discovery · Design Thinking · Demand Prioritization

Customer Experience: VOC · User Journey Mapping · Rapid Prototyping · Wireframing (Figma) · UX Research

Execution & Delivery: Scrum · Kanban · Backlog Management · BDD (Cucumber/Gherkin) · Continuous Improvement · Agile Coaching

Tools:

Jira · Rally · Confluence · Lovable · Figma · SQL · NotebookLM · Whimsical · PowerBI · Microsoft Visio · Oracle Database · LLM/Copilot Enablement

Training / Courses

Awarded for exceptional contribution as Business Analyst and Product Owner (Q1 2018)

Led and awarded for Diversity & Inclusivity initiatives, driving LGBTQ+ awareness programs (Q4 2023, Q3 2024)

Won Most Creative Booth at the Technology Showcase (Q3 2024)
