SUMMARY

Product Manager with 14+ years in financial services, driving 0→1 product builds and platform modernization across capital markets, credit cards, and regulatory tech. Led cross-functional squads of up to 15 engineers and designers to ship products that improved operational efficiency by 40%, boosted feature adoption by 3x, and maintained 99.5%+ platform uptime. Deep expertise in AI product enablement (Copilot, LLM-based triage agents), post-trade workflows, and regulatory compliance platforms. Certified PSPO & PSM with a strong bias toward data-driven roadmap decisions, rapid prototyping, and measurable business outcomes

EXPERIENCE

Product Manager — Morgan Stanley

Jun 2021 – May 2026

Managed the development of innovative software products in a fast-paced tech environment.

Mumbai

- Defined product strategy and led end-to-end delivery of a German Tax Reporting modernization platform serving 50K+ accounts, achieving 100% regulatory compliance and reducing audit escalations by 60%
- Owned discovery, user research, and VOC synthesis across 8 stakeholder groups, translating insights into a prioritized roadmap that cut feature rework by 50% and improved sprint velocity by 25%
- Launched an AI-powered Production Support Agent (Microsoft Copilot) that automated L1 triage using historical incident data, reducing mean-time-to-resolution (MTTR) by 35% and saving 120+ engineering hours/month
- Designed data control and enrichment workflows for post-trade exception handling, reducing downstream reconciliation failures by 25%
- Led rapid prototyping sprints for Voucher Generation portal (50+ wireframes in Balsamiq), cutting time-to-market by 30% and increasing internal user adoption by 2x within the first quarter
- Acted as the primary product interface for ED and MD-level stakeholders, delivering outcome-based reporting tied to OKRs across cost, risk, reliability, and adoption metrics

Product Owner — JPMorgan Chase

Dec 2016 – Jun 2021

Shipped credit card onboarding platform — 25% faster time-to-market

Mumbai

- Owned and launched the credit card onboarding product roadmap end-to-end, automating workflows that eliminated 400+ hours/quarter of manual processing and reduced time-to-market for new card launches by 25%
- Managed the product backlog as Area Product Owner for 3 squads, improving story readiness and acceptance rate and increasing sprint completion rate to 92%
- Partnered with global payments teams to redesign the balance transfer flow, improving payment processing accuracy by 15% and saving 900+ FTE hours annually through automation
- Built and shipped KPI dashboards tracking platform adoption, cost-per-transaction, reliability, and risk posture — enabling senior leadership to tie engineering spend to measurable business value
- Drove quarterly roadmap planning with structured value-vs-effort prioritization, maintaining 80%+ alignment with business-critical initiatives across 4 product lines
- Introduced Agile best practices (BDD with Cucumber/Gherkin, outcome-oriented sprint planning) that improved defect detection by 40% and reduced QA cycle time by 30%

Application Developer — JPMorgan Chase

Sep 2013 – Jun 2014

Automated reporting workflows — 40% reduction in processing time

Mumbai

- Automated 5 business-critical reporting workflows, reducing manual processing time by 40% and freeing up 60+ analyst hours/month for higher-value tasks
- Led UI/UX redesign of legacy application using Balsamiq prototypes (15+ wireframes), achieving 90% positive usability feedback and improving task completion rate by 20%
- Shipped 15 feature enhancements across 10 modules, improving application performance by 25% and reducing support tickets by 30%.

Product Analyst — IGATE

Dec 2010 – Feb 2013

Delivered 3 major product releases on time — 25% sprint transparency improvement

Mumbai

- Managed a cross-functional team of 9 developers and QA engineers, delivering 3 major product releases on time and within budget with zero critical post-launch defects

- Facilitated agile ceremonies and 10+ cross-functional alignment sessions, improving sprint transparency by 25% and reducing requirement ambiguity by 35%
- Built and maintained a defect tracking system for 200+ issues, improving developer response time by 40% and reducing average resolution time from 5 days to 3 days

System Analyst — JPMorgan Chase

Aug 2008 – Nov 2010

Automated 75% of system processes — 25% faster operational reporting

Mumbai

- Led process automation via CyberArk onboarding, automating 75% of manual system workflows and reducing operational overhead by 30%
- Designed and deployed SQL-based operational dashboards that improved reporting speed by 25% and enabled real-time visibility into system health for 8 client accounts
- Resolved 50+ production incidents as IT-business liaison, maintaining 99%+ system uptime and reducing average incident resolution time by 20%

SKILLS

Product Management: Product Vision & Strategy, Roadmap Ownership, MVP & Increment Planning, OKRs & North Star Metrics, Product Discovery, Design Thinking, Demand Prioritization

Customer Experience: VOC, User Journey Mapping, Rapid Prototyping, Wireframing (Balsamiq), UX Research

Execution & Delivery: Scrum, Kanban, Backlog Management, BDD (Cucumber/Gherkin), Continuous Improvement, Agile Coaching

Tools: Jira, Rally, Confluence, Lovable, Balsamiq, SQL, NotebookLM, Whimsical, PowerBI, Microsoft Visio, Oracle Database, LLM/Copilot Enablement

CERTIFICATIONS

Professional Scrum Product Owner (PSPO I) — Scrum.org

Professional Scrum Master (PSM I) — Scrum.org

Product Management Accelerator Program — IIT Roorkee

ACHIEVEMENTS

Awarded for exceptional contribution as Business Analyst and Product Owner (Q1 2018)

Recognized as the first team in Technology to adopt Balsamiq for UI redesign workflows (Q1 2023)

Led and awarded for Diversity & Inclusivity initiatives, driving LGBTQ+ awareness programs (Q4 2023, Q3 2024)

Won "Most Creative Booth" at the Technology Showcase (Q3 2024)

EDUCATION

Rajiv Gandhi Institute of Technology

Mumbai, IN

B.E. in Information Technology

2008
